What's New In Pankaj 039;s Address Book?

Pankaj's Address Book is a handy and easy to use address book application designed to input data on three parameters: Business Cards, Staff Details and Others which includes your friends and relatives. It is your personal address book, which is a very easy to use address book application. This feature-rich address book application will help you to keep the contact details for both business and personal. You can add, modify and delete records easily without any hassles. The records are easy to search, filter and sort. You can add a new record by clicking the plus button. You can modify and delete records in any of your record. An address book is an easy-to-use address book application that includes all of the contacts in your address book. It includes two categories: Business Contacts—All of your business contacts. You can import all contacts from the Windows Address Book by using the Import command. You can also export all contacts to the Windows Address Book. Personal Contacts—Contacts of your family members, friends, and co-workers. The address book application has the ability to add, modify, and delete contacts. This address book application also has the facility of importing contacts from other address books. There are different groups in the address book application and the contact information can be organized into the groups. All records are displayed in a tree view. You can sort records alphabetically, according to last name or first name or by the group. You can also filter the records by name, address, phone number, or group. This address book application supports sync with Outlook 2010. The address book application can be used as a standalone address book application, however, it is better to use this address book application along with Outlook for better performance. Importance of Address Book: An address book application is really necessary if you have hundreds of contacts in your address book. It will be difficult for you to search, modify and delete them. So, address book applications are very much needed. You can find many address book applications on the internet but Pankaj's Address Book has many unique features. It is the only application that includes address book with the feature of filtering records by the group name. Benefits of Pankaj's Address Book: Pankaj's Address Book is a desktop application. It will help you to add, modify and delete contacts, contacts from other address books, import contacts and export contacts. It also has the feature of sync with Outlook 2010. You can create new groups and organize your contacts into the groups. The address book application includes various features like: Add new records—Click the Plus button to add a new record. You can import all contacts from the Windows Address Book by using the Import command. You can also export all contacts to the Windows Address Book.
